

Weighing Data Logger **AD-1688**

Save, Carry, and Retrieve

The AD-1688 weighing data logger is a handheld device that lets you collect weighing data without connecting the balance or scale to a PC!

Dual Interface

An RS-232C interface to import weighing data from an A&D balance or scale and a USB interface to export the data to a PC (no driver software is required)

Large Memory

Approx. 5,000 weighing data sets (in the A&D standard format) can be stored

Internal Clock

The date and time the data is saved is stored in data

Highly Portable

Small size and IP65 dust and waterproof (with the casing cover)

No Battery Required

Receives power supply directly from a balance, scale or PC

(Actual size)

The AD-1688 is especially useful when a PC or printer cannot be placed near the balance or when you need to collect data from multiple balances at different locations (such as in a factory)
